## **DETAILED ACTION**

### ***Response to Remarks***

1. The Office Action has been made issued in response to amendment filed May 21, 2007. Claims 1-2 and 6-8 are pending. Applicant's arguments have been carefully and respectfully considered in light of the instant amendment, and some are persuasive. However, Applicant amendments have caused some limitations in the claims not to have proper antecedent basis. Accordingly, this action has been made FINAL

### ***Claim Objection***

Claims 4-5 have been cancelled, therefore the objection have been removed.

### ***Response to 112 Rejection***

Claims 7-8 have been amended to overcome the 112 indefinite rejections. Therefore, the rejection has been removed.

### ***Response to 102 Rejection Arguments***

In response to applicant's argument on page 2, [p][004] that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., initializing a current configuration that is randomly selected) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re*

*Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Applicant has also argued that Honsinger teaches away from the invention, however, Applicant has not provided any evidence to support such conclusion.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-2 and 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitations "the message template performance metric" in line 3 and "the message template geometric configuration" in line 4. There are insufficient antecedent basis for these limitations in the claim.

Claim 2 recites the limitation "the spatial domain component" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 7 recites the limitation "the spatial domain component" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 8 recites the limitation "the frequency domain component" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 is rejected as incorporating the deficiencies of claim 1 upon which it depends.

### ***Conclusion***

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
